52/1 Bong Sao Street, Ward 5, District 8, Ho Chi Minh City, Vietnam

## OBJECTIVE

Seeking a Junior/Entry-level Full-Stack Developer position where I can apply my knowledge of Node.js, .NET, and React to build real-world applications.
I aim to strengthen my technical skills, gain hands-on experience, and contribute effectively to a collaborative development team while growing into a professional software engineer.

## TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, C#
Frontend: ReactJS, React Native, Next.js, HTML5, CSS3, Tailwind CSS, Material UI, Native Base
Backend: Express.js, NextJs, ASP.NET Core, Entity Framework Core (EF Core)
Databases & Infrastructure: MongoDB, MySQL, SQL Server, Redis, RabbitMQ
DevOps & Deployment: Git, GitHub, Nginx, Linux Server, GitHub Actions (CI/CD), Docker
Soft Skills: Problem Solving, Team Collaboration, Result-oriented Leadership, Time Management,

## EXPERIENCE

**Sen Viet Co., Ltd** **Sep, 2025 - Nov, 2025**

FULL-STACK DEVELOPER INTERN

- Developed an IT Asset Management System using Node.js, React, and MongoDB.
- Built RESTful APIs and responsive UI for asset tracking and maintenance workflows.
- Implemented JWT authentication and automated scheduling features.
- Wrote tests and used Docker for consistent development and deployment.

## PROJECTS

**Knowledge Base Management System (KBMS) | Capstone Project (Grade 9.3/10)**
**Sep, 2025 - Apr, 2026**

Full-stack Developer

- Engineered a 4-tier knowledge storage architecture (.NET 8) supporting structured entities and rule-based data modeling
- Proposed KBQL, a custom SQL-like query language, and built a full compiler pipeline (Lexer, Parser, AST) for query processing
- Developed a storage engine with B+ Tree indexing and Write-Ahead Logging (WAL) for efficient and reliable data operations
- Implemented an inference engine for automated reasoning over knowledge data, supporting complex multi-step queries
- Integrated RBAC-based access control and derivation tracing for secure, explainable system execution

**ANH GIA TATTOO WEB — Anh Gia Tattoo Studio | Personal Project**
**Dec, 2025 - Jan, 2026**

Full-Stack Developer

- Built and optimized an SEO-driven web platform, achieving 100+ daily organic users and generating 100+ qualified leads
- Integrated Google Analytics and Ads for user tracking and data-driven growth optimization
- Implemented security mechanisms (rate limiting, IP blocking) to ensure a reliable booking system
- Developed an admin dashboard with automated email workflows, reducing manual operations by ~50%
- Designed data tracking pipelines using SQL (Stored Procedures) to monitor engagement and conversion metrics

**IT ASSET MANAGEMENT SYSTEM — Sen Viet Co., Ltd |**

Fast Learning & Adaptability

## EDUCATION

**HONG BANG INTERNATIONAL UNIVERSITY - VIETNAM**

**Sep, 2022 - Apr, 2026**

BACHELOR OF COMPUTER SCIENCE

Major: Artificial Intelligence & Software Development
GPA: 2.82/4.0
Relevant Coursework:
Web Application Development (9.4), Advanced Artificial Intelligence (9.3), Graph Theory (9.1)

**Personal Project**
**Sep, 2025 - Nov, 2025**

Full-Stack Developer Intern

- Built an asset management system with automated maintenance scheduling, reducing manual effort by 40% and ensuring zero missed cycles
- Designed RESTful APIs (Node.js/Express) to manage 500+ assets and support end-to-end workflows
- Implemented secure authentication using JWT with refresh tokens for scalable session management
- Developed a responsive dashboard (React, Redux Toolkit), improving data entry efficiency by 30%
- Migrated from spreadsheets to a centralized database, reducing 95% of data redundancy and errors

## AWARDS & ACHIEVEMENTS

**Jun, 2025**
First Prize - HIU Startup Competition: Innovative healthy snack startup project focusing on nutritional value and market potential

**Jul, 2024**
Consolation Prize - AI-based Efficiency Improvement Contest (BOSCH): AI-integrated smart scale solution for automated warehouse inventory and mechanical inspection

**Jun, 2023**
Consolation Prize - BUIDL Vietnam Hackathon: Blockchain-based digital music rights management system using Smart Contracts and decentralized storage
